

Raising the Bar in Construction Services

The Construction Division's services include general contracting, construction management, new construction, major remodels, multi-store rollouts, and store-within-a-store construction. We specialize in open store environments, which are especially demanding in their mix of construction skills, project management, and customer sensitivity.

In hiring Harco you enjoy the advantages of a single point of accountability. We are budget conscious, meet deadlines, and are focused on finding the best possible solution if problems arise. Harco works closely with each client to meet deadlines and adhere to the budget. With the fluctuating cost of materials, the division takes a value-engineering approach to all projects, finding innovative ways to substitute materials without sacrificing quality and by looking at life cycle cost.

Our senior executive team each has more than 25 years of experience in retail construction, and has worked with notable clients including Albertsons, Gelson's Markets, Vons, Ralphs, CVS, Rite-Aid, T-Mobile, and Clearwire.

Harco offers expanded construction services. Our retail fixture installation division provides the best service available; Mal-Wal, our barricade system division, has been providing personalized client services throughout California since 1988.

Harco's Construction Division Differentiators

- Fierce dedication to budget and schedule
- Problem-solving approach
- Specialists in open store construction
- Multi-site rollout expertise
- Extensive experience in food service establishments
- Fixture installation and barricade systems also available

About Harco Group Inc.

Harco offers comprehensive services in construction, fixture installation, and barricade systems to retail companies. Company executives bring decades of nationwide experience, and a client portfolio of some of the largest and best respected retail organizations. Our problem-solving approach to every project is combined with scrupulous attention to project schedule and budget.
